

Precision cast and surface treated magnesium cone coupled to a natural rubber surround showing no sign of midrange (edge) resonances.

Patented Hexadym magnet system of acoustically transparent design to avoid cavity resonances and air flow noise. The magnet system based on 6 small, radially magnetized Neodymium blocks is compact to reduce the reflexion of sound energy to a minimum.

Heavy copper rings mounted above and below the T-shaped pole piece reduce non linear and modulation distortion and increase overload margin.

Extremely stiff and stable injection moulded metal basket keeps the critical components in perfect alignment. Large windows in the basket both above and below the spider reduce sound reflexion, air flow noise and cavity resonance to a minimum.

A solid copper phase plug enhances the performance of the copper rings and improves heat conduction away from the pole piece.

The frequency responses above show measured free field sound pressure in 0, 30, and 60 degrees angle using a 7L closed box. Input 2.83 VRMS, microphone distance 0.5m, normalized to SPL 1m. The dotted line is a calculated response in infinite baffle based on the parameters given for this specific driver. The impedance is measured in free air without baffle using a 2V sine signal.

Nominal Impedance	8 Ohms	Voice Coil Resistance	5.5 Ohms
Recommended Frequency Range	50 - 3000 Hz	Voice Coil Inductance	0.49 mH
Short Term Power Handling *	200 W	Force Factor	5.1 N/A
Long Term Power Handling *	70 W	Free Air Resonance	38 Hz
Characteristic Sensitivity (2.83V, 1m)	85 dB	Moving Mass	9.5 g
Voice Coil Diameter	26 mm	Air Load Mass In IEC Baffle	0.38 g
Voice Coil Height	14 mm	Suspension Compliance	1.8 mm/N
Air Gap Height	6 mm	Suspension Mechanical Resistance	0.91 Ns/m
Linear Coil Travel (p-p)	8 mm	Effective Piston Area	75 cm ²
Maximum Coil Travel (p-p)	14 mm	VAS	14 Litres
Magnetic Gap Flux Density	1.0 T	QMS	2.58
Magnet Weight	0.06 kg	QES	0.50
Total Weight	0.80 kg	QTS	0.42
